

Elite Sports & Fitness

Multi-Academy Sports, Fitness & Athlete Development Platform
Application Blueprint

1. Project Concept

A centralized platform for an organization operating multiple sports academies, gyms and fitness facilities. It manages the athlete journey from registration and academy assignment through training, attendance, performance, practice levels, physician sessions, competitions and transfers.

2. Core Hierarchy

Organization → Academies / Branches → Sports / Departments → Programs → Batches → Coaches / Trainers
+ Athletes / Members.

3. User Roles

Super Admin/Owner; Academy Manager; Coach/Trainer; Physician; Nutritionist; Receptionist; Athlete/Member; Parent/Guardian.

4. Main Modules

Organization & Academy Management; Athlete Management; Sports, Gym & Fitness Programs; Batches & Scheduling; Attendance; Training Plans; Performance; Practice Levels; Physician Sessions; Nutrition; Tournaments; Academy Transfers; Memberships & Payments; Notifications; Reports; Roles & Permissions.

5. Athlete Lifecycle

Registration → Athlete Profile → Academy Assignment → Sport/Program → Batch Assignment → Coach Assignment → Training → Attendance → Performance Assessment → Practice Level Progression → Physician/Nutrition Support → Competitions → Achievements → Renewal/Transfer/Exit.

6. Attendance Flow

Select Academy → Program → Batch → Session → Display athletes → Mark Present/Absent/Late/Excused → Save → Update statistics.

7. Performance Flow

Coach selects athlete → creates assessment → records sport-specific skills and fitness metrics → adds feedback → compares history → saves assessment → recommends level promotion.

8. Practice Levels

Level 1 Beginner → Level 2 Foundation → Level 3 Intermediate → Level 4 Advanced → Level 5 Elite. Each sport can define its own promotion criteria.

9. Physician Session Flow

Request session → physician reviews authorized profile → conducts session → records assessment and recommendations → sets training status such as Cleared, Restricted or Temporarily Not Cleared → follow-up.

10. Academy Transfer Flow

Start transfer → select source and destination academy → enter date/reason → review/approval → update current academy → preserve complete history. The athlete is never duplicated.

11. Athlete Profile Sections

Overview; Personal Information & Guardian; Academy/Program/Batch/Coach; Attendance; Performance; Practice Level; Training; Medical; Nutrition; Competitions; Achievements; Transfer History; Memberships & Payments.

12. Dashboard Requirements

Organization: academies, athletes, attendance, programs, revenue, transfers. Coach: batches, sessions, attendance, assessments. Athlete: schedule, attendance, level, performance, plans and achievements.

13. Recommended Pages

Public Home; Programs; Program Details; Coaches; Facilities; Memberships; Registration; Login; Organization Dashboard; Academy Dashboard; Athlete Directory; Athlete 360 Profile; Coach Dashboard; Attendance; Performance; Practice Levels; Physician Portal; Transfers; Tournaments; Payments; Reports.

14. MVP Development Order

Branding → Authentication → Multi-academy structure → Sports/Programs/Batches → Profiles → Scheduling → Attendance → Performance → Practice Levels → Transfers → Dashboards → Memberships/Payments.

15. Phase 2

Physician portal; Nutritionist portal; Parent dashboard; Tournament management; QR check-in; Advanced analytics; Notifications; Certificates.

16. Key Product Rules

One organization can operate multiple academies. Athletes can transfer without losing history. Assessments are historical. Attendance is session-based. Practice-level changes are permanent records. Medical data is role-restricted. Important actions should have audit trails.

17. Portfolio Positioning

A Multi-Academy Sports, Fitness & Athlete Development Management Platform that provides a continuous athlete profile across multiple academies, training, performance, medical support, competitions and transfers.
